

MEETING REPORT

Team Name: _____ **Date of Meeting:** 03/04/2023

Start Time: 10:00 **End Time:** 12:00 **Meeting Location:** Epoka University

Moderator: Enris Kumi **Recorder:** Enris Kumi

Other Members Present: Enris Kumi

Faik Koprenca

Daniel Abdiaj

Redi Ceni

Fjoralb Tashi

Ervin Shyti

Members Absent: None

Topics Discussed: Three members of the frontend team recently learned about React.js and Material UI. React.js is a popular JavaScript library used for building user interfaces. Its component-based architecture allows developers to create reusable code and easily manage complex Uis. Three members of the backend development team have recently acquired knowledge in using AWS and TypeScript. AWS, which stands for Amazon Web Services, is a cloud computing platform that provides various services such as computing, storage, and databases. With AWS, the team can easily manage and scale their backend infrastructure, reducing the operational overhead of setting up and managing physical servers.

Decisions Made: The backend will start building some scenarios using aws structures. And the frontend team will continue to learn more about ReactJs and MUI.

Tasks Assigned:

- **Redi Ceni, Daniel Abdiaj and Fjoralb Tashi will learn more about MUI and ReactJS**
- **Enris Kumi and Faik Koprenca will start with defining aws services that we will use and Ervin Shyti will learn more about typescript.**

Time, Place, and Agenda for Next Meeting:

- **Time: 11:00-13:00, 11/04/2023 at Epoka University**
- **Gather all the informations about our research and have a brainstorming session for the continuity of the project.**
